

This reference list includes works alluded to by Bengt Linderoth, MD, PhD, in “A Q&A on the Need for Pain Research” at <http://faer.org/about/paincouncilqa.html>.

1. Linderoth B, Gheradini G, Ren B. and Lundeberg T.: Pre-emptive spinal cord stimulation reduces ischemia in an animal model of vasospasm. *Neurosurgery*, 37: 266-272, 1995.
2. Stiller, CO, Cui, J-G, O`Connor WT, Brodin E, Meyerson BA and Linderoth B: Release of GABA in the dorsal horn and suppression of tactile allodynia by spinal cord stimulation in mononeuropathic rats. *Neurosurgery* 39: 367-375, 1996.
3. Cui J-G, Linderoth B and Meyerson BA: Effects of spinal cord stimulation on touch-evoked allodynia involve GABAergic mechanisms. An experimental study in the mononeuropathic rat. *Pain* 66: 287-295, 1996.
4. Cui J.G., O`Connor W.T., Ungerstedt U., Meyerson B.A., Linderoth B.: Spinal Cord Stimulation attenuates augmented Dorsal Horn Release of Excitatory Amino Acids in Mononeuropathy via a GABAergic Mechanism. *Pain* 73: 87-95, 1997.
5. Yakhnitsa V., Linderoth B. & Meyerson BA.: Modulation of dorsal horn neuronal activity by spinal cord stimulation in a rat model of neuropathy: the role of the dorsal funicles. *Neurophysiology* 30 (6): 424-427, 1998.
6. Yakhnitsa V., Linderoth B., Meyerson B.A.: Spinal cord stimulation attenuates dorsal horn neuronal hyperexcitability in a rat model of mononeuropathy. *Pain* 79: 223-233, 1999.
7. Gherardini G., Lundeberg T, Cui J-G., Eriksson S.V., Trubek S and Linderoth B.: Spinal Cord Stimulation Improves Survival in Ischemic Skin Flaps: An experimental study of the possible mediation via the calcitonin gene-related peptide. *Plastic and Reconstruct Surgery* 103(4): 1221-1228, 1999.
8. Foreman RD, Linderoth B, Ardell JL, Barron KW, DeJongste MJL, Hull SS, Chandler MJ, TerHorst GJ, Armour JA.: Modulation of intrinsic cardiac neuronal activity by spinal cord stimulation (SCS) in the dog: Implications for the use of SCS in angina pectoris. *Cardiovascular Research* 47 (2): 367-375, 2000.
9. Cui JG, Holmin S, Mathiesen T, Meyerson BA and Linderoth B: Possible role of inflammatory mediators in tactile hypersensitivity in rat models of mononeuropathy. *Pain* 88: 239-248, 2000.
10. Tanaka S., Barron KW., Chandler MJ., Linderoth B., Foreman RD.: Low intensity spinal cord stimulation may induce cutaneous vasodilatation via CGRP release. *Brain Research* 896:183-187, 2001.
11. Kingma J., Linderoth B., Ardell J L., Armour J A., DeJongste M J L., Foreman R D.: Neuromodulation therapy does not influence blood flow distribution or left-ventricular dynamics during acute myocardial ischemia. *Auton Neurosci. Basic and Clinical* 91(1-2): 47-54, 2001.
12. Tanaka S., Barron K W, Chandler M J, Linderoth B, and Foreman RD.: Role of primary afferent in spinal cord stimulation-induced

- vasodilatation: characterization of fiber types *Brain Research* 959(2): 191-198, 2003.
13. Tanaka S., Barron K W, Chandler M J, Linderoth B, and Foreman RD: Local cooling alters neural mechanisms producing changes in peripheral blood flow by spinal cord stimulation. *Auton Neurosci.*;104(2):117-27, 2003.
 14. Greenwood Van-Meerveld B., Johnson AC., Foreman R D and Linderoth B.: Attenuation by spinal cord stimulation of a nociceptive reflex generated by colorectal distension. *Autonomic Neuroscience*. 104(1): 17-24, 2003.
 15. Lind G., Meyerson B.A., Winter J., & Linderoth B.: Implantation of laminotomy electrodes for spinal cord stimulation in spinal anesthesia with intraoperative dorsal column activation. *Neurosurgery* 54(5): 1150-1154, 2003.
 16. Schechtmann G., Wallin J., Meyerson BA., & Linderoth B.: Intrathecal clonidine potentiates suppression of tactile hypersensitivity by spinal cord stimulation in a model of neuropathy. *Anesthesia & Analgesia* 99: 135-139, 2004.
 17. Lind G., Meyerson B.A., J, & Linderoth B.: Intrathecal baclofen as an adjuvant therapy to enhance effect of spinal cord stimulation. *Europ J Pain* 8: 377-383, 2004,
 18. Cardinal R., Ardell J, Linderoth B, Vermeulen M, Foreman RD, Armour JA: Spinal cord activation differentially modulates ischemic electrical responses to different stressors in canine ventricles. *Autonom Neurosci: Basic and Clinical* 111(1): 34-47, 2004.
 19. Tanaka S, Komori N., Qin C., Linderoth B, and Foreman RD.: Mechanisms of sustained cutaneous vasodilatation induced by spinal cord stimulation. *Autonomic Neuroscience*, July 30, 114(1-2): 55-60, 2004.
 20. Greenwood Van-Meerveld B., Johnson A C, Foreman R D and Linderoth B.: Spinal cord stimulation attenuates visceromotor reflexes in a rat model of post-inflammatory colonic hypersensitivity. *Auton Neurosci.: Basic and Clinical*, 122 (102): 69-76, 2005.
 21. Southerland EM, Milhorn D, Foreman RD, Linderoth B, DeJongste MJL, Armour JA., Subramanian V., Singh M., Singh K., Ardell JL.: Pre-emptive, but not reactive, spinal cord stimulation mitigates transient ischemia-induced myocardial infarction via cardiac adrenergic neurons. *Amer J Physiology. Heart Circulatory Physiol*: 292(1):H311-317, 2007
 22. Kumar K., Bucher E., Linderoth B., Meglio M., Van Buyten J-P.: Spinal Cord Stimulation: Avoiding Complications from spinal cord stimulation: Practical recommendations from an International Panel of experts. *Neuromodulation*. 10(1): 24- 33, 2007.
 23. Lind G., Schechtmann G., Lind C., Winter J., Meyerson BA, Linderoth B.: Subthalamic stimulation for essential tremor: Short- and long-term results and critical target area. *Stereotactic and Functional Neurosurgery*. 86:253-258 2008.
 24. Song Z., Meyerson BA., Linderoth B.: Muscarinic receptor activation potentiates the effect of spinal cord stimulation on pain related behaviour

- in rats with mononeuropathy. *Neurosci Lett.* (436) 7-12,2008 Feb 26; [Epub ahead of print]
